

Fullstack Software Engineer Internship 6 months

Apply: jobs@kiro.bio

Location: Paris

Starting date: Early 2024

Requirement: Internship on a final year of a Master's degree (Bac+5)

KIRO'S MISSION

Founded in 2019, Kiro is the first AI-powered digital health platform for clinical biology in Europe. It develops new approaches to medical biology using medical-grade artificial intelligence and cloud technology and leverages laboratory results to bring better outcomes for patients.

Most people find laboratory test results (such as blood or PCR testing) difficult to understand and act on. We developed a new approach to medical biology that is more clear, tailored, and relevant to patients. It was created in collaboration with leading laboratories, hospitals, and physicians, and it is already used by millions of people.

If well used, medical biology can drive an increased understanding of disease outcomes and patients' health to better diagnose and anticipate diseases. We believe this fundamentally holds the key towards true precision medicine. We have built Kiro to make this happen.

It is an exciting journey - Come be a part of it!

YOUR ROLE & RESPONSIBILITIES

We are looking for talented and passionate team members strongly willing to build the future of health with us. As an intern Software Engineer in the company, you will work in close relationships with Kiro's CTO and other members of the engineering team. In an environment where technology and digital haven't played all their cards yet, your work will directly contribute to shape a platform that benefits patients and has the potential to fundamentally change healthcare. Your role and responsibilities will be:

- Actively participate in the full development cycle of our cloud-based platform: design, development, tests, deployment, monitoring, alerting and support
- Design and deploy efficient infrastructures, supporting our AI algorithms
- Work on platform cybersecurity and personal data protection and treatment
- Be involved in designing and driving processes and good practices
- Work with people with different roles and backgrounds (Data Science, Product, Business...)

OUR TECH STACK

The languages we speak:

- Front: ReactJS, Redux, Typescript
- Back: Python, Django, MySQL, Pub/Sub, Redis...
- Ops: Google Cloud Platform, Docker, Kubernetes

OUR NEXT TEAMMATE

Some of the main characteristics we're looking for:

- Last year 6-months internship within a Master's degree from a top Engineering School or University
- Proven experience within school's and/or personal's projects
- Ability to take ownership and work within a team to drive projects to completion, with a pragmatic approach to problem solving that relies on a strong reasoning and analytical thinking to get things done!
- Quick adaptation to new situations and problems; the willingness to take the initiative and constantly strive to improve oneself.
- Have a great team spirit; understand how to trust your teammates' ideas while also challenging them when required.
- Professional Working Proficiency in French and English

WORKING ENVIRONMENT & ADVANTAGES

By joining Kiro, you will have the opportunity to:

- Work in a dynamic and ambitious start-up on a mission to transform healthcare 🙌
- Join a recognized, multi award-winning start-up, in a critical role 🌟
- Be mentored by a group of developers and devops, with various background and experience 👥
- Gain experience on a unique product allying digital health, data management and artificial intelligence for medicine.
- Be part of a diverse team that care about each other 🤝
- Be at the heart of France's most dynamic startup ecosystem.

Do you have what it takes?
